

Environmental Policy

Flughafen Zürich AG

Flughafen Zürich AG operates Zurich airport as a traffic hub and meeting center to fulfill national and international needs of mobility.

We accept environmental responsibility as part of our business strategy and comply with legal and regulatory environmental requirements. Beyond that, we reduce our environmental impacts and improve our environmental efficiency while considering economic and sustainability aspects.

Next to aircraft noise and air quality, we focus on the topics climate protection, energy consumption and natural habitat. We are progressive in the topics we can influence.

We involve staff and partners, cooperate with the authorities and lead an active communication with users and residents.

Stephan Widrig
Chief Executive Officer
